DALI potentiometer

GIRA Data sheet

Specification	Order No.	Packing unit	PS	EAN
0	2018 00	1	02	4010337023449

Features

- Switching and brightness adjustment for lights with a DALI interface.
- To generate the DALI voltage, a DALI power supply or a DALI potentiometer with an integrated power supply unit that conforms to the DALI specifications (DIN IEC 60926) is required.
- Can be operated simultaneously from several control points. Communication is via Broadcast.
- A basic brightness or a switch-on brightness can be stored.

Technical data

Current consumption: max. 2 mA

Installation depth: 32 mm

Single-wire connection: Max. 4 mm²

Ambient temperature: -5 °C to +45 °C

Notes

- When selecting the DALI power supply, the number of DALI devices and the DALI potentiometer (always counts as 1 device) must be factored in.
