

## System 3000 universal LED rotary dimming insert Standard

Specification	Order No.	Packing unit	PS	EAN
	2450 00	1/5	02	4010337031406

### Features

- Switching and dimming light bulbs, HV halogen lamps, electronic transformers for halogen or LED lights, dimmable inductive transformers for halogen or LED lights, HV LED or compact fluorescent lamps.
- Automatic setting of dimming principle according to load (leading or trailing edge).
- Switch-on function that preserves the life of the lamp.
- Switch-on brightness can be saved permanently.
- Switch on with the last brightness set, or a saved switch-on brightness.
- Minimum brightness can be set.
- Electronic short-circuit protection.
- Electronic excess-temperature protection.
- Operation with or without a neutral conductor connection.

### Technical data

Rated voltage: AC 230 V, 50/60 Hz

Standby: max. 0.35 W

Connected load at 25 °C

- HV LED lamps (leading edge): typically 3 to 60 W
- HV LED lamps (trailing edge): typically 3 to 120 W
- Compact fluorescent lamp: typically 3 to 60 W
- Light bulbs: 20 to 210 W
- HV halogen lamps: 20 to 210 W
- Tronic transformers: 20 to 210 W
- electronic transformer with NV-LED: typically 20 to 60 W
- Wound electronic transformer: 20 to 210 VA
- Wound transformer with NV-LED: typically 20 to 60 VA

Cable length

- Load: Max. 100 m

Installation: in device box pursuant to DIN 49073

Installation depth: 24 mm

Connection cross section

- Single-wire: Max. 4 mm<sup>2</sup>

Illustrations are similar and may deviate from originals.

- Fine-wire without core jacket: Max. 4 mm<sup>2</sup>
  - Fine-wire with core jacket: Max. 4 mm<sup>2</sup>
- Ambient temperature: -5 °C to +45 °C
- 

## Notes

- In principle, it is possible to operate the dimmer without connecting the neutral conductor, but some LED and CFLi light sources make the neutral conductor connection necessary to avoid flickering.
  - Operation without a neutral conductor increases the minimum load for light bulbs, HV halogen lamps, Tronic transformers and wound transformers to 50 W.
  - Electronic transformers and ballast devices for LED lamps can be operated with the dimming procedure specified by the manufacturer.
  - If the ambient temperature is higher than 25 °C, the connected load must be reduced.
-
