

Docking station insert

Specification	Order No.	Packing unit	£/piece without VAT	PS	EAN
	2281 00	1	84.65	03	4010337012931

Features

- The docking station is used to play music via the RDS flush-mounted radio or a stereo system and to charge the rechargeable batteries of smart phones and MP3 players.
- The device electronics are compactly located in a flush-mounted insert, meaning it can be installed in individual device boxes, e.g. in combination with the RDS flush-mounted radio.
- However, installation does not necessarily have to be within a frame for combinations. Detached positioning is also possible.
- The AUX output is used to connect to the RDS flush-mounted radio to play music.
- External music devices (smartphone, tablet PC, MP3 player) can be coupled for music playback via the integrated Bluetooth interface.
- With corresponding top units, the docking station can be used as a universal charging device for various smartphones and MP3 players. This enables music playback during charging.
- Because the top units can be easily exchanged so easily, the docking station can be used to charge smartphones with various charger interfaces.
- The docking station can also be used exclusively as a charging station.

Technical data

Rated voltage:	AC 230 V, 50 to 60 Hz
Maximum charging current:	1000 mA
Charging voltage:	DC 5 V
Standby:	< 0.3 W
Cable length of AUX connection:	max. 3 m
Number of Bluetooth connections:	max. 8
Installation depth:	32 mm
Ambient temperature:	-5 °C to +45 °C
