System 3000 universal LED rotary dimming insert Komfort

GIRA Data sheet

Specification	Order No.	Packing unit	£/piece without VAT	PS	EAN
0 0	2455 00	1/5	105.27	02	4010337031413

Features

- Switching and dimming light bulbs, HV halogen lamps, electronic transformers for halogen or LED lights, dimmable inductive transformers for halogen or LED lights, HV LED or compact fluorescent lamps.
- Connecting auxiliary units is possible.
- Automatic or manual setting of dimming principle according to load (leading or trailing edge).
- Display of the selected operating mode using LED.
- Switch-on function that preserves the life of the lamp.
- Switch-on brightness can be saved permanently.
- Switch on with the last brightness set, or a saved switch-on brightness.
- Hotel-card function can be activated: Light switches "On" following power interruption (from index 01).
- Minimum brightness can be set.
- Electronic short-circuit protection.
- Electronic excess-temperature protection.
- Operation with or without a neutral conductor connection.

Technical data

AC 230 V, 50/60 Hz Rated voltage:

Standby: max. 0.35 W

Connected load at 25 °C

- HV LED lamps (leading edge): typically 3 to 100 W - HV LED lamps (trailing edge): typically 3 to 400 W - Compact fluorescent lamp: typically 3 to 100 W - Light bulbs: 20 to 420 W 20 to 420 W - HV halogen lamps: - Tronic transformers: 20 to 420 W - Electronic transformer with LV LED typically 20 to 100 W

(leading edge):

- Electronic transformer with LV LED (trailing

typically 20 to 200 W

20 to 420 VA - Wound electronic transformer:

- Wound transformer with NV-LED: typically 20 to 100 VA

- Non-illuminated mechanical push buttons: unlimited

Illustrations are similar and may deviate from originals. Prices valid for United Kingdom with prices valid 08/24.

www.gira.com

- 2-wire auxiliary insert: unlimited- 3-wire auxiliary insert: max. 10

Cable length

- Auxiliary unit: Max. 100 m- Load: Max. 100 m

Installation: in device box pursuant to DIN 49073

Installation depth: 24 mm

Connection cross section

Single-wire: Max. 4 mm²
Fine-wire without core jacket: Max. 4 mm²
fine-wire with core jacket: Max. 4 mm²

Ambient temperature: -5 °C to +45 °C

Notes

- In principle, it is possible to operate the dimmer without connecting the neutral conductor, but some LED and CFLi light sources make the neutral conductor connection necessary to avoid flickering.
- Operation without a neutral conductor increases the minimum load for light bulbs, HV halogen lamps, Tronic transformers and wound transformers to 50 W.
- Electronic transformers and ballast devices for LED lamps can be operated with the dimming procedure specified by the manufacturer.
- If the ambient temperature is higher than 25 °C, the connected load must be reduced.
