Weather control unit for KNX

GIRA Data sheet

Specification	Order No.	Packing unit	£/piece without VAT	PS	EAN
	5147 00	1	311.51	06	4010337124412

Features

- The weather control unit is used in combination with the weather sensor 8380 00, evaluates the sensor information and sends it to the KNX:
- Wind speed
- Outdoor temperature
- Brightness in lux of all three brightness sensors incl. maximum brightness.
- Precipitation (yes/no)
- Up to 20 weather control units can be connected to one weather sensor.
- 10 sensor channels for wind, precipitation, temperature and brightness. Logical AND/OR links can be created within the sensor channels to evaluate multiple sensor values together.
- Evaluation delay for all sensors to ensure reliable functionality.
- 8 sun protection channels for 8 facades with automatic sun protection function incl. evaluation delay to ensure a reliable sun protection function.
- 2 objects for external brightness sensors.
- Pre-defined day/night object for switchover between day/night mode incl. separate activation/deactivation function via the communication object.
- Communication object that provides information about any communication problems between the weather control unit and the weather sensor.

Technical data

KNX medium: TP256

KNX rated voltage: DC 21 to 32 V SELV

Internal consumption: max. 0.5 W

KNX connection: 0.6 to 0.8 mm (bus line e.g. J-Y(St)Y 2 x 2 x 0.8)

Maximum cable length between weather

sensor and weather control unit:

1,000 m

Protection class: IP20

Protection class:

Rated surge voltage: 0.8 kV

Number of weather control units that can be connected to a weather sensor:	20			
Ambient temperature:	-5 °C to +45 °C			
Notes				
- KNX Data Secure compatible.				
Scope of supply				
- Connection and junction terminal for KNX included with delivery.				
Dimensions				
Modular width (MW):	3
